PROFESSIONAL EXPERIENCE

Work Arrangement Clarification: Brand Butler AI was a full-time role through 2026 and is now project-based. Other continuing relationships are listed clearly as contract, after-hours, team-supported, or project-based work to avoid confusion with full-time employment.

MedXFactor Inc. | Full Stack Developer • long-term development role **2014 – Present**

- Developed multiple large-scale software applications using PHP, Laravel, Vue.js, MySQL, and custom backend/frontend systems.
- Worked on platforms containing millions of records, requiring careful attention to database structure, performance, scalability, and reliability.
- Built and maintained backend systems, frontend interfaces, admin portals, and client-facing application features.
- Implemented microservice-style software environments using Docker.
- Developed and supported Android and iOS applications, WordPress websites, and client-requested software improvements.
- Collaborated with other developers and communicated with clients to review issues, requests, and future improvements.

Brand Butler AI | Web Developer • full-time through 2026; now project-based **2024 – Present**

- Developed and supported the brandbutler.ai website and related web systems.

- Served in a full-time development capacity through 2026, then transitioned into project-based support.
- Maintain client websites, including WordPress sites, custom functionality, plugins, themes, integrations, and performance updates.
- Meet directly with clients to review technical issues, explain solutions, and complete requested website changes.
- Support technical marketing implementation including Google Analytics, Google Ads, Facebook Ads, tracking setup, and SEO-related tasks.
- Maintain WHM/cPanel hosting environments for client websites and troubleshoot server, plugin, and performance issues.

Adrian Agency | Web Developer

2022 – 2024

- Built, designed, updated, and maintained client websites and software applications for the agency before its closure.
- Collaborated with designers, marketers, and project managers to deliver polished, functional, responsive websites.
- Troubleshoot WordPress, hosting, plugin, theme, and front-end issues as they occurred.
- Managed website updates, plugin updates, theme maintenance, and long-term technical support.
- Completed assigned development tasks within approved budgeted hours and deadlines.

Manage Petro | Contract WordPress Developer • **after-hours support**

2019 – Present

- Built, maintained, and supported WordPress websites for Manage Petro and related client projects.
- Provided debugging, troubleshooting, plugin/theme updates, custom development, and technical issue resolution.
- Helped ensure websites remained secure, updated, functional, and user-friendly.

Vision and Hope | Contract Web Developer • **project-based**

2015 – Present

- Designed, built, maintained, and supported websites and software applications.
- Troubleshoot website issues, server-side problems, plugin conflicts, and front-end bugs.
- Maintained WHM server environments and completed projects within budgeted hours and deadlines.

Lester Lehman | Contract Web Developer • **project-based**

2020 – Present

- Built and maintained client websites and web applications.
- Provided technical support, troubleshooting, website updates, and development improvements.
- Maintained functionality, responsiveness, and user experience across supported websites.

Inmatefone | Web Developer

2021 – 2022

- Supported and maintained multiple large software platforms, including InmateBooks, Inmatefone, Inmatefoto, Inmatefoto Micro Corrlinks, and ClearVOIPInc.
- Managed several servers hosting production applications and worked with Zabbix monitoring and FreeSWITCH server environments.
- Collaborated closely with the support team to resolve client issues, software bugs, and server-related problems.

Webjed | Contract Web Developer • **project-based**

2020 – 2024

- Built, maintained, and supported websites and software applications for client projects.
- Collaborated with designers and project teams to deliver functional and visually professional web experiences.
- Troubleshoot website issues, bugs, plugin conflicts, hosting problems, and custom functionality requests.

Artbees Care | Web Developer

2018 – 2020

- Completed client web development projects and provided WordPress support, troubleshooting, maintenance, and website updates.
- Assisted clients with technical issues related to themes, plugins, websites, and hosting environments.

All Things Ecommerce | Contract Web Developer • **project-based**

2015 – 2019

- Built and maintained WordPress websites and eCommerce-related client projects.
- Completed custom WordPress development tasks, troubleshooting, updates, and hosting support.
- Maintained WHM server environments and delivered projects within approved hours and deadlines.

- Developed custom websites and web applications for client projects.
- Built and maintained WordPress websites, custom apps, and front-end improvements.
- Worked with designers and client teams to deliver polished web experiences.

- Built and maintained WordPress websites and completed custom WordPress development tasks.
- Collaborated with designers and project teams while troubleshooting website, plugin, theme, and hosting issues.

- Provided direct customer support for WordPress-related products and technical issues.
- Diagnosed and resolved WordPress, plugin, theme, compatibility, and server-side issues.
- Acted as a bridge between customers, QA, and development teams.
- Recognized as a top-performing support team member, responding to 80+ tickets per day.
